

# Module 8: Assignment 1

## Tasks To Be Performed:

1. Create a custom role which can view, start and stop VMs
2. But should not be able to do anything else

## Solution:

The screenshot shows the Azure portal interface. The top navigation bar includes 'Home' and 'Subscriptions'. The main content area is titled 'Subscriptions' and shows a list of subscriptions. The first subscription is 'Free Trial' with ID 'b38e9b3d-e40f-4a03-9ae8-665ff950134' and status 'Active'.

Below the subscriptions list, the 'Free Trial | Access control (IAM)' page is shown. The left sidebar contains a navigation menu with options like 'Overview', 'Activity log', 'Access control (IAM)', 'Tags', 'Diagnose and solve problems', 'Security', 'Events', 'Cost Management', and 'Cost analysis'. The main content area displays the 'Access control (IAM)' page for the 'Free Trial' subscription. It includes a warning about 'Classic administrators' being deprecated on August 31, 2024. The page has tabs for 'Check access', 'Role assignments', 'Roles', 'Deny assignments', and 'Classic administrators'. The 'Check access' tab is active, showing 'My access' and 'Check access' sections.

A dropdown menu is visible at the bottom left, showing options: '+ Add', 'Download role assignments', 'Add role assignment', and 'Add custom role'.

No permissions to display.	

Add permissions

### Add permissions

Search for permissions to add to your custom role. For example, search for "virtual machines" to find permissions related to virtual machines.

Microsoft.Compute/virtualMachines

**Microsoft Compute**  
Access cloud compute capacity and scale on demand (such as virtual machines) and only pay for the resources you use.

Microsoft.Compute permissions

×

Microsoft.Compute/virtualMachines	
<input checked="" type="checkbox"/> Read : Get Virtual Machine ⓘ	Get the properties of a virtual machine
<input type="checkbox"/> Write : Create or Update Virtual Machine ⓘ	Creates a new virtual machine or updates an existing virtual machine
<input type="checkbox"/> Delete : Delete Virtual Machine ⓘ	Deletes the virtual machine
<input checked="" type="checkbox"/> Other : Start Virtual Machine ⓘ	Starts the virtual machine
<input type="checkbox"/> Other : Power Off Virtual Machine ⓘ	Powers off the virtual machine. Note that the virtual machine will continue to be billed.
<input type="checkbox"/> Other : Reapply a virtual machine's current model ⓘ	Reapplies a virtual machine's current model
<input type="checkbox"/> Other : Redeploy Virtual Machine ⓘ	Redeploys virtual machine
<input type="checkbox"/> Other : Restart Virtual Machine ⓘ	Restarts the virtual machine
<input type="checkbox"/> Other : Retrieve boot diagnostic logs blob URIs ⓘ	Retrieves boot diagnostic logs blob URIs
<input checked="" type="checkbox"/> Other : Deallocate Virtual Machine ⓘ	Powers off the virtual machine and releases the compute resources
<input type="checkbox"/> Other : Generalize Virtual Machine ⓘ	Sets the virtual machine state to Generalized and prepares the virtual machine for capture
